

ONLINE SHOE STORE

Date: 25-08-2022

Guide: Sr. Elsin Chakkalackal S.H

1. Project Overview?

The main objective for developing this Online shoe store is to sell the shoes of different brands online. This project provides a lot of features to manage the products in very well manner. This project contains a lot of advance modules which makes the backend system very powerful. The project is divided into two categories: Admin and customer Login.

2. To what extend the system is proposed for?

Online shoe store shopping is the process preferred by many these days. Hence my mini project has designed an easy and efficient online shoe shopping system project using the PHP programming language. This shoe shopping system is many collections of footwear for girls and boys paired with very profitable offers and deals to choose from this website.

Thus, this online shoe shopping will help people by providing a way to purchasing shoes just by resting at home.

All the manual difficulties in managing the student details in a school have been rectified by implementing computerization.

3. Specify the Viewers/Public which is to be involved in the System?

The General Users are involved in the system.
